

Counselor Meeting d. 15/11 – 2013

Agenda:

- Show the Design / Explain Concepts
- Progress with implementation
- Feedback on Problem Statement
- Schedule
- Other

Ad. 1:

The Blackboard Design was displayed, Hua responded: "It looks fine".

Database Design shown:

- If you can, you should unify the tables. It will give a more elegant design.

Ad. 2:

Progress shown:

Ad. 3:

The current writing is on a very preliminary state.

You have put a lot into the analysis. – Maybe you want to use less space on going through your brainstorm.

Maybe you can merge the first 2 chapters, to show why we need this. There is no need for it to be this long.

It is pitifull when you mention all these features that you don't implement anyway.

This semester is more about technology implementation, you don't need a chapter about language. Or development methods.

Hua wants more focus on design and implementation. Less space should be used on the background of the project, like language and analysis of the problem.

The problem statement, is more general and non-technical. It looks more like a requirement. – You should focus more on the last sentence.

Why?

What?

How?

Emphasize the usefulness of your project, you can help solve some real life uses, with this device.

Ad. 4:

Judging from the report, you are behind.

You need to be prepared for the time it will take for setting your devices together.

Ad. 5:

Remember to send me some updates on your project each week.

Hua will be in China for the next two weeks. But we can still contact him over mail, and set up a skype meeting if need be.
